H5 Denver Is Ideally Suited for Data Center Needs of All Sizes

H5's Denver data center campus is purpose-built, sits on 14+ acres in the Denver Tech Center, and is comprised of four buildings totaling nearly 300,000 square feet.

The Denver data center offering is unique given the site's size, best-in-class physical security and protocols, and unparalleled uptime track record: 19+ years of 100% uptime. Vibration-sensitive fences, 24x7 onsite security staff, and multiple layers of access checkpoints make this data center one of Colorado's most secure facilities.

Diverse Data Center & Colocation Offering

+Powered shell data center space
+Data center build-to-suit
+Wholesale data center space
+Large, customized colocation cages
+Retail colocation, meet-me room interconnection

H5 DATA CENTERS
